01.15	GESTIÓN DE RESIDUOS (OT-T12)					
PGESRES100	ud Punto limpio en obra para acopio y almacén de los residuos					
	Punto limpio en obra para acopio y almacén de los residuos generados en la construcción. Incluye una zona despejada para el acopio de material no peligroso así como una zona habilitada para materiales peligrosos. esta última se constituye por una estructura de chapa prefabricada de 9x3 m que supone la parte superior del almacenamiento (techo y las paredes), la parte inferior consta de una solera de hormigón, (que actuará como cubeto de retención ante posibles derrames líquidos) lo cual requiere una excavación a máquina previa de 20 cm, para colocar un encachado de piedra y una lámina de plástico, después se realizará la solera de hormigón de 15 cm de espesor con mallazo de acero, para constituir la base del almacén que deberá tener una mínima inclinación para desembocar a un sumidero sifónico de pvc, que se conectará con un tubo de pvc (con una longitud de unos 6 m) a una arqueta prefabricada también de PVC. dicha arqueta requerirá además de una fábrica de ladrillo tosco para proteger dicho elemento. el precio del almacén incluye además un cartel de identificación, un extintor de polvo abc, así como sepiolita para recoger posibles derrames líquidos pastosos (ej. grasas). inclusive la mano de obra necesaria para la colocación del cartel, el extintor, la sepiolita, así como de la lámina de plástico y tornillos que sujeten la estructura prefabricada a la solera de hormigón.

02.14	GESTIÓN DE RESIDUOS (T12-D.C.)					
PGESRES100	ud Punto limpio en obra para acopio y almacén de los residuos					
	Punto limpio en obra para acopio y almacén de los residuos generados en la construcción. Incluye una zona despejada para el acopio de material no peligroso así como una zona habilitada para materiales peligrosos. esta última se constituye por una estructura de chapa prefabricada de 9x3 m que supone la parte superior del almacenamiento (techo y las paredes), la parte inferior consta de una solera de hormigón, (que actuará como cubeto de retención ante posibles derrames líquidos) lo cual requiere una excavación a máquina previa de 20 cm, para colocar un enchado de piedra y una lámina de plástico, después se realizará la solera de hormigón de 15 cm de espesor con mallazo de acero, para constituir la base del almacén que deberá tener una mínima inclinación para desembocar a un sumidero sifónico de pvc, que se conectará con un tubo de pvc (con una longitud de unos 6 m) a una arqueta prefabricada también de PVC. dicha arqueta requerirá además de una fábrica de ladrillo tosco para proteger dicho elemento. el precio del almacén incluye además un cartel de identificación, un extintor de polvo abc, así como sepiolita para recoger posibles derrames líquidos pastosos (ej. grasas). inclusive la mano de obra necesaria para la colocación del cartel, el extintor, la sepiolita, así como de la lámina de plástico y tornillos que sujeten la estructura prefabricada a la solera de hormigón.

P41ETT-001C	kg Acero galvanizado					
	Acero S275 y S355 estructural y de calderería con protección mediante galvanización de cinc por el método (D) en caliente VH., (D) 100 micrómetros/m2 700 g/m2. Comprendiendo: Transporte carga y descarga a taller de galvanización, preparación del material, desengrase eliminando mediante tratamientos preliminares restos de pinturas manchas de grasa etc, decapado superficial de óxidos por inmersión en ácido sulfúrico o clorhídrico diluido, tratamiento con flujo e inmersión en baño de zinc fundido a través de la cubierta de flujo que flota sobre el material fundido, a temperatura de 445-465 °C. Montaje e instalación completa en obra. Unidad totalmente instalada.

P7COMCABL1B	m Cable de fibra óptica 8F+fusiones+cajas					
	Cable de fibra óptica para exteriores de 8 fibras ópticas monomodo en tubos activos holgados y tubos pasivos cableados cubiertos con material blanqueante del agua , elemento de refuerzo, cubierta interior de polietileno, cabos de fibra de vidrio como elemento de protección antirroedores y refuerzo a la tracción y cubierta exterior de polietileno de 13.6 mm de diámetro . Según EN 60794. Incluidas cajas de empalme para fibra, las fusiones y conectorizaciones. Unidad totalmente instalada y probada.					
CCTV		7	30,00			210,00
						210,00
P7COMCCTV5	ud Cámara visión nocturna IP-66+carcasa+columna y cimentación					
	CCTV					
	Cámara de alta generación a utilizar mediante IP instaladas en soportes y protegidas mediante carcasas exteriores calefactadas y estancas, con IP 67, estas cámaras serán móviles y de visión nocturna con zoom motorizado. Alimentación eléctrica Las características de la cámara seleccionada cumplirá: Sensibilidad IR, para una calidad de imagen superior en condiciones de poca luz; El barrido progresivo proporciona imágenes de máxima resolución de objetos en movimiento y sin distorsiones; Alimentación a través de Ethernet (IEEE 802.3af); Hasta 45 imágenes por segundo en resolución VGA 640 x 480; Detección de movimiento multiventana; Vídeo: Velocidad de captura en vídeo digital: 45 fps / Resolución máxima: 640 x 480 Píxeles; Vídeo, modalidad de compresión: MJPEG, MPEG-4 Motion simultáneos; Características de la lente: Longitud focal: 3 - 8 mm Enfocar: 1.0Sensor de imagen: Tipo de sensor: CCD; Tamaño del sensor óptico: 1/3 " Conectividad: Puertos de entrada y salida (E/S): RS-232, RS-485/422 Seguridad:Características físicas: Multi-level password, IP address filtering, HTTPS encryption. control de contraluz WDR, vídeo sensor de movimiento por área o cuadrícula, con alimentación DC12 V / AC24 V. Incluso: soportes necesarios, caja de conexión y protección, cable interior, pica de tierra, cableado interior coaxial RG-59, guías y pequeño material. Unidad totalmente funcionando con emisión de imágenes y datos vía GSM/GPRS.

P4RSACEQ01	m Reposición acequia+excav+rellenos Reposición de acequia de riego prefabricada o ejecutada in situ de sección trapezoidal variable junta machiembreada, incluidas juntas polobreal o similar ejecutada sobre base rasanteada y solera de hormigón nivelado, incluidas operaciones de excavación y relleno localizado, incl. bypass durante la ejecución de las obras (si fuera necesario) para mantenimiento de servicio. Unidad totalmente instalada.	1	235,00			235,00
						235,00
P3CUN-002	m Cuneta o azarbe de tierras secc. trapezoidal var. 0.5-1.2x1.5 Reposición de azarbe o cuneta trapezoidal de sección variable similar a existente con base de 0.5-1.2m de ancho y altura variable según perfil longitudinal de altura entre 0,50 m a 1.5m, con taludes 1/1, incluyendo excavación en cualquier tipo de terreno, aplicación puntual de martillo, carga y transporte de los productos resultantes de la excavación a vertedero o lugar de empleo, incluso refino de taludes, embocadura con cunetas/azarbes existentes y red de drenaje existente. Unidad totalmente terminada.	sm	1	160,00		160,00
						160,00
P3SCDN500	m Salvacuneta dn=500 HA incl. arqueta + zanja+relleno HM-20 Salvacuneta en caminos, mediante ejecución e instalación de tubo de hormigón de diámetro 500 mm, macizado de hormigón HM-20 en su cobertura de al menos 0.5 cm , embocadura de hormigón con aletas según planos de detalle, encofrado y desencofrado de los mismos, incluso excavación de zanja de 0.8 m de ancho de base, taludes 1H/3V hasta una altura de 1.5m, transporte a vertedero de material sobrante, relleno posterior con suelo procedente de excavación hasta cota de terreno natural y reperfilado de nueva cuneta a embocadura en una longitud de 5.0m, colocación de rejilla de protección de anegamiento de salvacunetas conformado por perfiles de acero S-275JR compuesto por perfiles tubulares de 12 mm c/ 10 cm, sobre marco L-50-5. Unidad totalmente terminada según se define en planos.	s/m	1	10,00		10,00
						10,00
P4RSSFIBC1	m Demolición y gest. residuos conduc. fibrocemento DN<1200 Demolición y gestión de residuos de conducciones de fibrocemento de DN<1200mm, desmontaje manual por personal especializado y medios auxiliares necesarios , paletizado, flejado y etiquetado a pie de obra, carga, transporte y gestión de residuos a cargo de empresa registrada R.E.R.A., incluso redacción de plan de trabajo y unidad de descontaminación, carga y transporte a vertedero, canon de vertido, tratamiento si procede de aspiración con filtros adecuados y pulverización con líquido encapsulante adecuado, según mediciones exigidas por ley, transporte autorizado, desplazamiento de equipos de desamiantado con esclusas de descontaminación en los compartimentos que sean necesarios, equipos de protección EPI's P3, coordinado con el al Plan de Seguridad y Salud. Unidad completa incluso colocación de bridas ciegas en T.		1	165,00		165,00
						165,00
P4RSS1C	m Dem, desmont y retirada tubería DN >1000 Localización, demolición, desmontaje programado y retirada de tubería de abastecimiento/riego y/o saneamiento/ pluviales de DN >1000mm, Incluyendo operaciones asociadas a la demolición , carga y transporte a vertedero de sobrantes, canon de vertido y operaciones auxiliares de bypass provisional para mantenimiento de servicio durante las operaciones de conexión. Unidad totalmente terminada.	sm	1	30,00		30,00
						30,00
P1MT06A	m³ Demolición muro o losa hormigón armado+tte+canon Demolición de muro o losa de hormigón armado de espesor variable con retromartillo rompedor, i/retirada de escombros a pie de carga, precorte y corte de armaduras con disco, maquinaria auxiliar de obra, carga y transporte a vertedero, incluso canon de vertido.		1	46,75		46,75
						46,75
P1MT03B1	m³ Excavación localizadas medio-duro+agotam+Tte vertedero Excavación localizada en zanja de conducciones, obras de conexión, pozos y cimentaciones, en sección trapezoidal o recintos entibados, ejecutado con medios mecánicos en cualquier clase de terreno blando, medio y duro (aluvial, terciario y transición ripable) con aplicación puntual de martillo, incluyendo extracción de los productos a borde de la excavación, carga y transporte a acopio y/o vertedero autorizado a cualquier distancia, agotamientos necesarios para cualquier caudal, canon de vertido y operaciones de reperfilado necesarias. Unidad totalmente terminada medido sobre perfil teórico.	sm	1	858,00		858,00

03.13	GESTIÓN DE RESIDUOS (DC-T21 y DC-T14/15)					
PGESRES100	ud Punto limpio en obra para acopio y almacén de los residuos					
	Punto limpio en obra para acopio y almacén de los residuos generados en la construcción. Incluye una zona despejada para el acopio de material no peligroso así como una zona habilitada para materiales peligrosos. esta última se constituye por una estructura de chapa prefabricada de 9x3 m que supone la parte superior del almacenamiento (techo y las paredes), la parte inferior consta de una solera de hormigón, (que actuará como cubeto de retención ante posibles derrames líquidos) lo cual requiere una excavación a máquina previa de 20 cm, para colocar un enchachado de piedra y una lámina de plástico, después se realizará la solera de hormigón de 15 cm de espesor con mallazo de acero, para constituir la base del almacén que deberá tener una mínima inclinación para desembocar a un sumidero sifónico de pvc, que se conectará con un tubo de pvc (con una longitud de unos 6 m) a una arqueta prefabricada también de PVC. dicha arqueta requerirá además de una fábrica de ladrillo tosco para proteger dicho elemento. el precio del almacén incluye además un cartel de identificación, un extintor de polvo abc, así como sepiolita para recoger posibles derrames líquidos pastosos (ej. grasas). inclusive la mano de obra necesaria para la colocación del cartel, el extintor, la sepiolita, así como de la lámina de plástico y tornillos que sujeten la estructura prefabricada a la solera de hormigón.

04.08.04	SISTEMA DE CONTROL Y COMUNICACIONES BALSA DE TUDELA					
P7COMARM01	ud Armario de control 2000 x 800 x 600mm					
	Suministro e instalación de armario de Teletransmisión tipo OLN de 2000x800x600 con puerta transparente color RAL5012, para alojamiento de equipos de autómatas y equipos de comunicaciones de compuesto en su interior por: Bandeja para equipos, cuadro sinóptico, conjunto de iluminación accionado por puerta, ventilación por extractor controlado por termostato, filtro para entrada de aire, resistencia de caldeo y termostatos, protecciones eléctricas a equipos, equipo de conmutación de alimentación de 24 V, protecciones contra sobretensiones, rearme, switch, placa de montaje con equipos y borneros instalados, regleteros de entrada salida, entradas y salidas digitales aisladas a través de bornas relés, protección de señal y alimentación, separadores galvánicos, barra de fijación de cables, bandeja para módem ethernet, entrada de cables por pasamuros de goma semipartida, prensas, etc..., incluso mecanizado y bancada, con todos los equipos que contiene totalmente montados, cableados, conexiados y probados.	1				1,00
						1,00
P7COMNODO1	ud Nodo comunicaciones GSM/GPRS G3-5. incl.cuadro protec.					
	Ud Suministro e instalación equipo de comunicaciones bidireccional compuesto de alimentación autónomo de batería de bajo mantenimiento, conexión y cuadro eléctrico, cableado a toma, CPU, memoria flash, módem GSM/GPRS/G3-5 y modem de comunicaciones, armario IP65, armario mural de 19", 12 U y 600 mm de profundidad. , RAL 7035, IP66 alta resistencia a golpes IK10 (5Kg a 40cm de altura), resistente a agentes químicos y radiación solar, -25°C a 100°C, resistencia al fuego, Soportes para fijación 750°C), 100% reciclable, Placa de montaje metálica ciega mural, Resistencia calefactora 40W a 0°C y 6W a 40°C; Termostato -10°C A 80°C contacto; Ventilador con filtro IP54, 23m3/h, con filtro de 105x105mm; Kit de rejilla+filtro aire de 105x105mm; Protecciones eléctricas para acometida eléctrica (diferencial+magnetotérmica), salida SAI(diferencial+magnetotérmica), electrificación cuadro (magnetotérmica), protecciones fuentes (magnetotérmico por cada fuente), equipos (magnetotérmico por cada equipo); Protección COMBINADA Magnetotérmica+Diferencial I+N 16A 6kA, 300mA. Protección acometida cuadro, y salida SAI; Protección Magnetotérmica II10A 6kA. Protección forma de enchufe e instrumentación; Protección Magnetotérmica I 10A 6kA. Protección fuentes y equipos; Protección contra sobretensión fuente de 24Vcc, con protección fina (700A), salto a 31Vcc, protección individual por cada línea de tarjetas de E/S; Rearme automático de cuadro eléctrico; Picas de protección o conexión a picas existentes, incluido cable de protección; módulos de expansión de señales de entrada y salida, parametrizables mediante la herramienta de programación y con distintas densidades de señal.; Incluyendo ingeniería de detalle, calibración y cualquier otra medida auxiliar para la correcta instalación y funcionamiento de la unidad. Unidad totalmente terminada y operativa.	1				1,00
						1,00
P7COMNODO2	ud Nodo comunicaciones radiofrecuencia. incl.cuadro protec.					
	Ud Suministro e instalación equipo de comunicaciones compuesto por equipo radio modem half duplex en la banda de los 380-470 mhz 2400 baudios. incluso antena direccional en la banda 380-470 mhz de 6-12 dbi de ganancia, cable rf de baja pérdida y elementos necesarios para la correcta instalación y montaje. totalmente instalado y probado.	1				1,00
						1,00
P7COMP005	ud Bastidor Automata					
	Suministro de bastidor para autómatas de 10 slots, tipo 1756-A10 de Allen Bradley o similar.	1				1,00
						1,00
P7COMPLC01EP	ud PLC proglamable integrable (ED:192 SD:96 EA:72 SA:32)					
	PLC centralizador de todos los sistemas (EA:128 SD:32 EA:16 SA:8) SIEMENS o similar, programable incluidos módulos de ampliación necesarios. Incluye programación del autómatas, instalado y probado, batería, fuentes de alimentación, protecciones eléctricas, cableado y protecciones de sobretensión. Toda la unidad completa, instalada y probada según PPTP, incluyendo pequeño material, montaje, documentación, embalaje y transporte a planta (Canaletas, carril DIN, bornas,...); mano de obra montaje.	1				1,00
						1,00

04.15	GESTIÓN DE RESIDUOS (BT)					
PGESRES100	ud Punto limpio en obra para acopio y almacén de los residuos					
	Punto limpio en obra para acopio y almacén de los residuos generados en la construcción. Incluye una zona despejada para el acopio de material no peligroso así como una zona habilitada para materiales peligrosos. esta última se constituye por una estructura de chapa prefabricada de 9x3 m que supone la parte superior del almacenamiento (techo y las paredes), la parte inferior consta de una solera de hormigón, (que actuará como cubeto de retención ante posibles derrames líquidos) lo cual requiere una excavación a máquina previa de 20 cm, para colocar un enchado de piedra y una lámina de plástico, después se realizará la solera de hormigón de 15 cm de espesor con mallazo de acero, para constituir la base del almacén que deberá tener una mínima inclinación para desembocar a un sumidero sifónico de pvc, que se conectará con un tubo de pvc (con una longitud de unos 6 m) a una arqueta prefabricada también de PVC. dicha arqueta requerirá además de una fábrica de ladrillo tosco para proteger dicho elemento. el precio del almacén incluye además un cartel de identificación, un extintor de polvo abc, así como sepiolita para recoger posibles derrames líquidos pastosos (ej. grasas). inclusive la mano de obra necesaria para la colocación del cartel, el extintor, la sepiolita, así como de la lámina de plástico y tornillos que sujeten la estructura prefabricada a la solera de hormigón.
